

To manage your domain's email

1. Log into your control panel
2. Click on the Mail icon

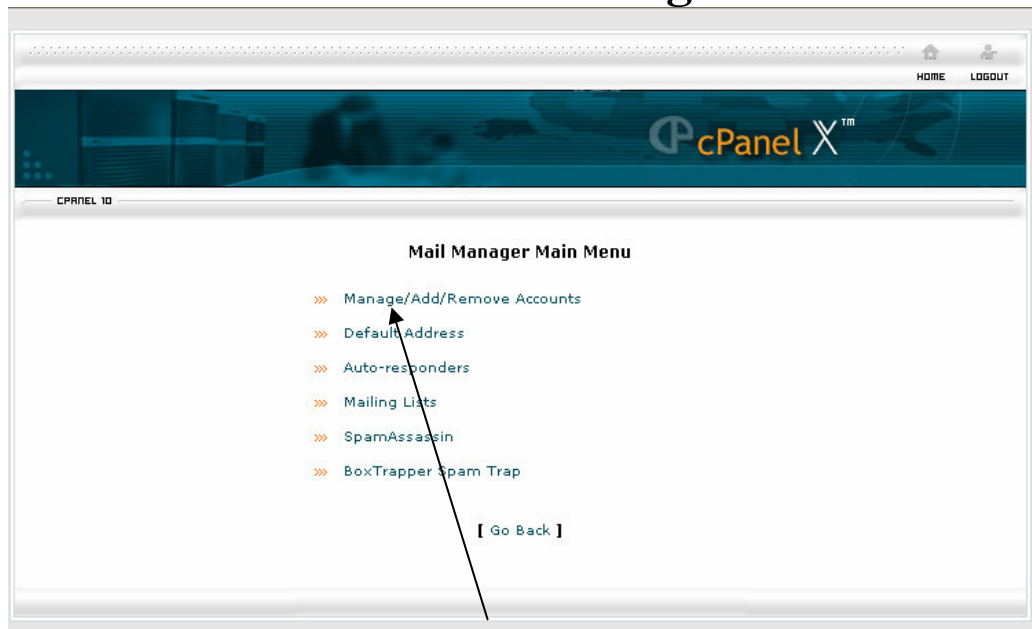

The screenshot shows a web hosting control panel interface. At the top, there is a navigation bar with the text "Hardware Networks Internet Design" and the "ROCK NETWORKS" logo. Below the navigation bar, the user is logged in as "cpdemo.com!". The interface includes a "Please update your contact information here." message and a "General account information:" table. To the right of the table is a grid of icons for various services, with an arrow pointing to the "Mail" icon.

3. You will see the Mail Manager menu

4. Click on Manage/Add/Remove Accounts

5. Click on Add Account

The screenshot shows the 'Add Mail Account' form in the cPanel interface. The form includes the following fields and elements:

- E-mail:** A text input field containing 'demo' followed by a dropdown menu showing '@ cpdemo.com'.
- Password:** A text input field containing 'password'.
- Quota (optional):** A text input field containing '10' followed by the unit 'Meg'.
- Buttons:** 'Create' and 'Clear' buttons.
- Footer:** A '[Go Back]' link.

- 6. Enter the email address and password. You can also set a quota for the user. The default is 10 megs. Then press Create.**

The screenshot shows the 'Mail Account Maintenance' page in the cPanel interface. The page displays the following information:

- Section:** 'Mail Account Maintenance'.
- Message:** 'Account Created'.
- Text:** 'The e-mail account **demo@cpdemo.com** with the login **This feature cannot be used in demo mode** and password **password** with a quota of **10** megs was successfully created.'
- Footer:** A '[Go Back]' link.

- 7. An informational screen telling you the account has been created. To enter another address, click on Go Back.**
